

B2X-Consulting stands for

- Agile project management and competence in methodology
- Added value through integrity of quality management
- Conversion of interdisciplinary know how into your project success
- Transforming your requirements into user-friendly, efficient processes and solutions
- Business consulting and coaching to assure a successful completion of projects

Project Management

Successful project management for us means realistic planning and goal-oriented navigation in a changing environment. We know the method(s), the tasks and the measures needed to realise your project successfully. With us your project is in good hands.

Test- & Quality Management

Erroneous software carries operational risks, and further, the risk of image damage. As a test manager we plan and verify the software quality against the requirements. Therefore, we bring you a substantial contribution to the success of the project.

By doing quality management we are planning and controlling the quality of the project as well as the conformity of the project process.
